Scan X

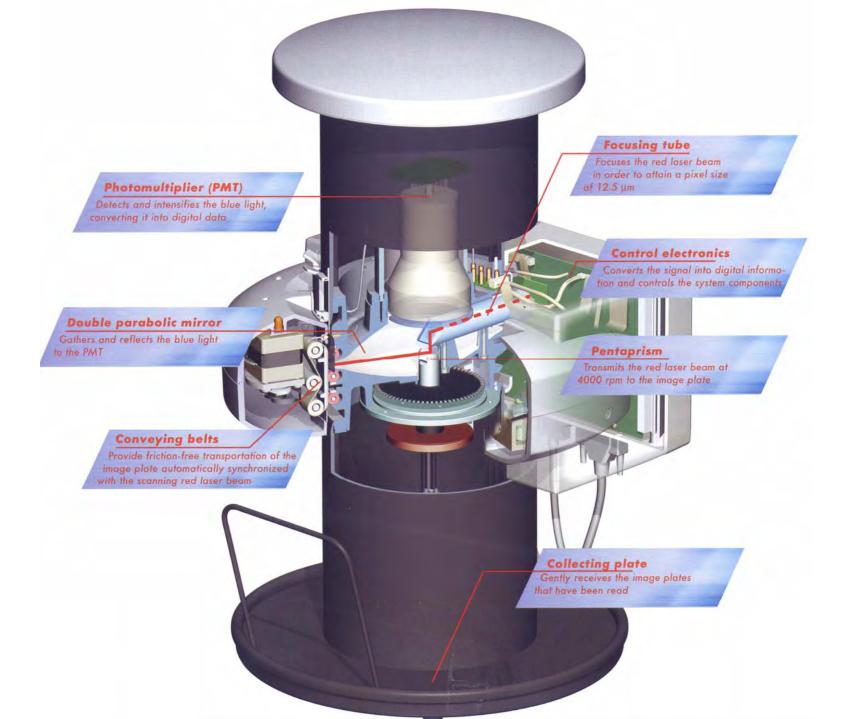

Advantages of Scan X

- Simple handling because of semi-automatic plate insertion
- High scanning speeds resulting in images being produced quickly
- Small laser spot of 12.5µm giving a max. theoretical resolution of 40 LP/mm
- Almost complete detection efficiency for absorbed X-ray quanta (96.3 %) thus minimizing interference that would spoil the image quality
- Complete utilization of the resolution of image plates available today and in future generations up to 40 LP/mm
- Operation under normal lighting conditions
- High dynamics (16 bit raw data)
