

NO. 066 Nasolabial cyst

<ul style="list-style-type: none">➤ Cyst 的三個要件：cystic wall、lumen / cavity、lining epithelium➤ Lining epithelium 很薄，有些斷裂，較偏向 pseudostratified columnar epithelium，有些地方還看到纖毛 (ciliated)，因為 nasolabial cyst 是位於呼吸道的地方➤ 此 case 的 fibrous wall 有些 RBCs 與 inflammatory cells	<p>標記重點：</p> <ol style="list-style-type: none">1. Cyst 三要素：cystic wall、lumen / cavity、lining epithelium2. Pseudostratified columnar epithelium (ciliated) (Fig. 1 green ↑)3. Goblet cell (Fig. 1 blue ↑)4. RBC 很多 (Fig. 1 yellow ↑)
